

Get your brain in gear for the 2019

All Moscow students from kindergarten to fifth grade are invited to participate in the Science Fair.

Students should select projects that match their interests and abilities. They should conduct experiments to explore a scientific question, or study how other scientists have answered that question.

The Science Fair provides an opportunity for students to engage in a fun science activity with their families.

What happens at the Fair?

Participating students are bused from their schools to the fair to talk to evaluators about their projects. Families and community members can visit at our Open House times.

Can parents volunteer?

You bet! We need evaluators, drop-off and pick-up helpers, Open House helpers and more. Pick times that work for you. Interested? Check the box on your child's registration!

CALENDAR
